Help !!

As some of you will know there was an accident on the farm and two farm workers died. It involved slurry and at some point 130,000 litres of slurry was released and found its way into the pond alongside our pond. Unfortunately it has leaked through into our pond and the fish are all suffering, Terry and I have been there all day rescuing fish.

I have arranged large aerators from the E.A. running on the pond along with our own pump all day.

The pumps need to be kept going 24/7 so I am staying tonight but would like to see a few faces tomorrow to maybe help with netting fish [long landing nets needed]

We have got a large pump extracting the foul water from the next pond but ours is not going to get better short term, only not worse.

Anyone that can help will be welcome if you want to call 07989817316 signal varies at the pond

Forty Hall Woodlands lake

Remember you must book before fishing here [no cost] speak in person no messages

I still want to know of any member not on line and therefore not getting this magazine, if you know of any member in this position please ask them to give me a ring

Any information, comments, thoughts or if you have photos or items for sale you can use the link to get in touch and I will try and transfer them to the web site and circulate in the newsletter
