29th Jan 2014

AGM

Our AGM is this **Tuesday the 4th February** if any member wants to give it a go on the committee let me know

We will also be voting on rules and subs

Work party

Sunday week 9th February is our second work party of the year. Woodlands lake at Forty Hall.

We will meet at 8am by the garages at the end of the road that goes past the car park or if you are not there in time down by the lake.

It will be a boot job as like every lake it is a bit damp. Gloves, secateurs, loppers anything that might be useful in pruning.

Due to the weather phone [below] on the Saturday to ensure it is all systems go.

Fisheries

Turnford

Water levels are very high at present and the banks quite 'moist'. Take great care when walking around the back of the lakes and in the natural swims, the 'manufactured' swims are OK with either gravel or chippings underfoot.

Railway

Not many anglers on the bank so therefore not many fish banked but they are still coming out, biggest I have seen is 28lbs but heard of larger from other bailiffs

Boot

Mainly Pike anglers with some getting multiple hook ups. 16lbs biggest.

Fishers green

Some trees have been removed from the river. Still several in there but they do offer fish holding areas albeit an eyesore with the debris decorating them.

Water up to the banks on some days but still fish being banked. Look for back eddies deep holes and areas behind flow breaks caused by trees in the water

First work party here will all being well be 23rd March more info nearer the time

RSA Relief channel

Running too fast most of the time for successful presentation of bait

Woodlands

A reminder that this is closed until 1st April

Paradise lake

Like pea soup most of the time with all the rain

The banks are very slippery being clay based so take care, having said that the fishing is slow and will be until it dries up a bit and warms up.

There is a work party scheduled here on 2nd March. We have two trees to deal with, I have cut most of one out just need a few hands on the rope to pull out both of them.

More info nearer the time.

New River, & Old River Lea

Both suffering from too much water
