There will be some Saturday and Wednesday parties watch the website and the Facebook page

Paradise lake

Unfortunately we are giving up this water.

For the last three years we have been hit by low oxygen levels when the leaves fall and fish deaths, on top of this we have suffered duck weed for two summers and this winter it has not died. We could tackle these problems but at a big cost and with the ownership of the estate and therefore our tenancy in doubt it is not a viable proposition.

Fisheries

Fishers Green.

Some really good chub, several featuring in the press. The barbel have not been so common but still better year on year as more anglers get to understand the water.

Morning and evening and low light days are still the starting point in the search

Pike are being caught from the pits but nothing big reported yet.

Turnford complex

Fewer anglers out during the winter but there have still been several carp banked. Pike anglers on all four of the pits and quite a few have come out to around the 18 lbs.

Forty hall

Closed at present re opens 1st April

RSA channel

Few pike taken when the water is clear, hard when coloured water coming down

Old river Lea

As the weed dies down roach, perch and small chub have come to light trotting method
